

MANWAR MERAJ

Senior .NET Developer | Backend & API Engineering | Team Lead

Bhubaneswar, Odisha, India | 7008366385 | manwar.meraj@gmail.com

PROFESSIONAL SUMMARY

Senior .NET Developer with 6+ years of experience designing, building, and optimizing backend APIs and business applications using C#, ASP.NET Core, Entity Framework Core, Dapper, LINQ, and Microsoft SQL Server. Currently leads a team of junior developers across multiple microservices, driving code quality through peer review, mentoring, and internal tooling. Hands-on experience with API gateway configuration, SQL source control, performance optimization (Redis caching, query tuning, load testing), and adoption of AI-assisted development workflows.

CORE SKILLS

Languages & Frameworks: C#, ASP.NET Core (MVC, Web API), Entity Framework Core, Dapper, LINQ, AutoMapper, Mapster

Databases: Microsoft SQL Server, MySQL, Redis

DevOps & Tools: Git, Jenkins, Docker, Azure VM, CI/CD Pipelines, SonarQube, Ocelot API Gateway

Testing & Monitoring: Postman, Mini Profiler, New Relic, JMeter

AI & Automation: Claude Code, MCP Servers, Plugins, Agentic/Multi-Agent Workflows, Prompt Engineering

Other: OAuth 2.0 / OpenID Connect, RDLC Reporting, HTML, CSS, jQuery, NLog

AI TOOLING & AUTOMATION

- Built and maintain an internal Claude Code plugin (eva-backend-api) encoding 69 EVA-specific backend development rules, rolled out to standardize AI-assisted coding across the engineering team.
- Designed an MCP (Model Context Protocol) server to automate GitHub pull request reviews for junior developers, exposing tools for pending-PR discovery, review, commenting, requesting changes, approval, and merge.
- Architected a multi-agent code review workflow (review agent, fix agent, re-review agent) to raise the quality bar on junior developer PRs before they reach a human reviewer.
- Delivered internal training sessions on effective AI-assisted development, demonstrating the difference between generic and context-rich prompting for real EVA backend tasks.
- Applied Claude Code day-to-day across backend development, debugging, and internal tool-building (API debugger, SQL optimization) to increase team velocity.

PROFESSIONAL EXPERIENCE

Senior .NET Developer / Team Lead | Evolutionary Algorithms (EVA)

Feb 2023 - Present | Bhubaneswar, India

- Lead and mentor a team of junior .NET developers, conducting peer code reviews to raise code quality and support skill development.
- Develop and maintain backend REST APIs across multiple EVA microservices (Pricing.API, FinishedGoods.API, CRM.API, Tenant.API, etc) using ASP.NET Core, Entity Framework Core, and Dapper.
- Developed a real client IP forwarding through an Ocelot API Gateway.
- Led an internal SQL version control initiative: established a Git-based repository for stored procedures across four production databases and designed “eva-sql-reviewer”, a EVA standard claude plugin for fuzzy stored-procedure search, sp optimization for performance, and Git operations.
- Built a universal API debugging desktop tool used across EVA microservices, featuring cURL parsing, automatic repository discovery, and configurable authentication.
- Improved API and database performance through EF Core query optimization, Redis distributed caching, and JMeter load testing, producing performance roadmaps for management.
- Used CI/CD automation, SonarQube, and New Relic to debug, monitor, and release across multiple environments.

.NET Developer | Edusys Pvt Ltd

Sep 2021 - Feb 2023 Bhubaneswar, India

- Built REST APIs with complex business logic using ASP.NET Core.
- Developed and optimized stored procedures across SQL Server and MySQL databases.
- Created HTML, jQuery, and CSS templates for UI modules.

.NET Developer | Zeetsoft Pvt Ltd

Apr 2021 - Sep 2021 Bhubaneswar, India

- Built REST APIs using ASP.NET Core.
- Developed UI components with HTML, CSS, and jQuery.
- Learned and applied testing and troubleshooting best practices.

Technical Support Engineer | JDB Solution Ltd

Jan 2020 - Apr 2021 Bhubaneswar, India

- Installed and configured client applications, including SQL Server environments.
- Delivered training sessions to customers on software updates and new systems.

KEY PROJECTS

Eva ERP Cloud - Backend Developer

Cloud-based ERP for fenestration companies covering opportunity tracking, dynamic 3D quotations, site survey data collection, sales/work order management, and inventory tracking.

Vabro - Full Stack Developer

Agile product development tracking tool built around sprint-based delivery cycles.

Inventory Management System - Full Stack Developer

Online inventory system for stock tracking, faulty/return stock handling, transport tracking, reporting, and billing.

EDUCATION

Bachelor of Technology (B.Tech), Mechanical Engineering

Krupajal Engineering College - 2019

Diploma in Tool and Die Making, Mechanical

Central Tool Room and Training Center - 2016

LANGUAGES

English, Hindi, Odia
